

Workshop proposal for Wiltshire Council, 12 December 2011

Aim:

To raise awareness of opportunities for housing developers and renewable energy developers to work together to create low carbon developments

Audience:

Housing developers active in Wiltshire; Renewable energy developers; Councillors; Development managers

Agenda

10.30.am Welcome from Cheryl Hiles

10.35 to 11.45 Presentations – 1 hour 10 mins (plenary)

- Tony Norton, CEE University of Exeter, Introduction to low carbon development including a case study of Cranbrook (20 mins)
- Thomas Minter, Malaby Biogas, linking AD to new developments (15 mins)
- David Strong, delivering PV in Bradford-on-Avon (15 mins)
- Vincent Albano, Wiltshire Council and renewable energy (10 mins)
- Panel discussion and questions (10 mins)

11.45 to 12pm Coffee break

12 to 12.45 pm Workshop session 45 mins (breakout)

Presentation of 3 example scenarios based on real examples from another area. The scenarios will identify different opportunities to deliver low carbon development. Facilitated group discussion of the opportunities presented, looking at opportunities, barriers and motivations.

Groups need to be made up of representatives from each segment of the audience – i.e. housing developers, renewable energy developers, councillors, development managers

12.45 pm Feedback and wrap-up

1 pm – Lunch and networking
